

Scope, Evidence & Status Policy · v1.1

EN · 2026-10-10

This policy governs the current MOVETHICS Assessed process. The assessment procedure v1.0 sets its admissibility, evidence, decision, appeal and validity rules.

Core rules

- Each assessment defines the entity, geography, period, operation type, included and excluded relationships, and evidence coverage.
- Assessed is granted only after a human review of sufficient evidence for all ten EETC principles within the agreed scope. A fee, Charter signature, membership or Quick Check score cannot grant the status.
- Unknown, Not evidenced and Not applicable are distinct states. An unsupported claim cannot be treated as a positive finding.
- Findings must remain within the scope and confidence of the evidence. The applicant has a right to respond and to appeal to a different reviewer.
- A change to a Standard requirement requires a version, rationale and review of its effect on assessments, tests, scores and public claims.

Status

Assessed is the current evidence-based status. It is valid for at most twelve months and publication requires revocable consent. This policy creates no separate Verified status.
